RFID Event Management Services.

Module 4 of 10

Time and Attendance. This module can apply to all the scenarios where it is important to monitor the time that groups or individuals have spent within an event, right down to one on one meetings at Trade Shows and Conferences.

Let us assume all attendees and staff have been issued an RFID Card or Label and an event wide network installed.

Using an attended service or autonomous scanners all access points can monitor who, when and for how long individuals remained in that area. Useful for training, induction, venue attendance, real-time on site monitoring and more.

Coupled with the ability to send updates and alerts to individual mobile phones and staff PDAs this module enhances security, assists with attendance monitoring, reduces costs and provides important post event information for future planning.

Our Products and Services are competitively priced backed by a friendly, competent and experienced team ready to guide and support our Client's requirements.
