

## RFID Event Management Services.

### Module 5 of 10

Catering Management. This solution is suitable for both Crews and Visitors. With Crew Catering it is often the case that during build and break some people will be catered for on site and some not.

Issuing thousands of meal vouchers to those who are eligible takes a lot of time and often leads to confusion when they are handed to those who are not allocated catering.

With all Crew, Staff or Visitors registered to the central database all catering rights can be quickly assigned, edited, awarded or cancelled in real time. In addition, any dietary issues can be highlighted so that individuals can be aware of any types of food they would prefer not to eat.

Using this Catering Management service provides a far more accurate way for the event managers to check invoices with a digital record of all meals consumed. The CATERING MANAGEMENT Module save time, reduces costs and confusion and safeguards individuals with allergies.

Our Products and Services are competitively priced backed by a friendly, competent and experienced team ready to guide and support our Client's requirements.
